

# MG2000 MKII

The Faria MG2000 system represents a breakthrough in electronic marine engine monitoring instrumentation. The MG2000's are multifunction gauges with a stepper motor driven analogue display for Tach and Speed and high resolution multi-line display, providing access to all of the engine information right at your fingertips!

Additional Stepper  
Motor Gauges  
2" & 4"

Industrial & Vehicle Systems Available on request

Approved to suit: -  
Smartcraft  
J1939-J1708  
NMEA2000  
K-Line, ALDL

Available in 4" & 5" Options

New LCD 4-line screen

- Easily Connects to all Engine bus protocols
- Competitively Priced
- All units are GPS ready
- Reports engine diagnostic codes
- Fuel management right on gauge
- Stepper motor driven pointers
- User definable screens
- Available in a wide variety of Faria Marine standard styles
- Utilizes both analogue and digital inputs to reduce costs
- Multiple 5"/4"/2" instrument and dash set options
- Custom-built cosmetic options upon request
- Audible and visual alarms
- Waterproof marine connectors
- Fog resistant lenses standard
- Advanced digital functions including:

#### MG2000 Tachometer

- RPM
- Digital Trim Level
- Engine water pressure
- Engine temperature
- Engine hours
- Battery voltage
- Digital RPM

- Fuel Management system
  - Instantaneous fuel flow
  - Fuel consumed
  - Fuel remaining
  - Estimated range to empty
- System generated engine diagnostic messages.

#### Alarms and Fault Warnings:

- Over speed, over heat, reserve oil, battery voltage, low psi, low fuel
- Oil system fault, injector fault, ignition fault, horn failure.

#### MG2000 Speedometer:

- Boat Speed
- Time of day
- Current fuel level (Digital)
- Paddle wheel or pitot tube speed dial driver
- Barometer
- Oil tank levels
- Air and sea temperatures
- GPS information, speed over ground, Latitude, Longitude, Heading. (External GPS required via NMEA 0183 bus.)
- TrollControl
- Current course and speed over ground

#### Alarms:

- Low oil, low fuel, boat sensor failure, water in fuel.

# MG3000

LCD Display screen  
is available in  
neutral grey or the  
new bright **Green**

Additional Stepper  
Motor Gauges  
2"

The newly redesigned MG3000 offers a cleaner and crisper look to your dash. Larger buttons on the outside of the mask makes it easier to navigate the menus.

The MG3000 still displays the same great information that users have come to appreciate from the MG2000. The MG3000 continues to be the only solution for boat builders faced with multiple engine installs. No matter what protocol you are using the MG3000 will give the user concise and easy to read information right at their fingertips.
